EDUCATION

Middle East Technical University (ODTU)
Bachelor's (3rd year)
Computer Engineering Department
CGPA : 3.21

February 2020 - Present

CAREER OBJECTIVE

Currently a student and a part-time developer. Seeking to complete my next summer internship in an organization which can provide me the opportunity to improve my knowledge and experience both in fields that I have no experience in and the ones that I am accustomed to.

PROJECTS

- **Blog Styled Social Media Web Application**
- **Q&A Web Application Similar To StackOverflow**
- **An Intern Management System**
- **Inventory Analysis**
- **Network-Socket Application**

TECHNICAL STRENGTHS

- Advanced: C++, C, Python, Django, HTML, CSS, Data Structures, Algorithms, Git, Linux
- Intermediate: Javascript-Jquery, DBMS (SQL), OOP, Data Communications and Networking, Verilog, Assembly Language
- Beginner: JAVA, Docker, Docker-Compose, AJAX
- Brief Explanation: Through my years of education I have worked many times with C and C++, thus I have reached to a certain level of proficiency with these languages. During my last summer internship I have increased my Python knowledge even more and I also have developed several Web Applications using Django as the web framework and got comfortable with writing HTML, CSS, Javascript-Jquery and SQL. I currently am a part-time developer at the company where I have completed my summer internship (Nart Informatics). I currently have 4 months of work experience which keeps increasing.

PERSONAL TRAITS

- Always eager to learn new things and improve myself in new fields.
- Have no problems with working individually or with a team and can communicate efficiently. (I have participated in group projects.)
- Can work efficiently even in tight schedules in order to complete my tasks.
- Always have the motivation to achieve my current goals in order to set new ones.
